AMENDMENTS TO THE DRAWINGS

Applicant submits herewith a replacement drawing sheet for FIG. 4. No new matter has been added by way of this amendment.

In the description of FIG. 4, Applicant's specification describes retrieving address association information (step 52) from non-volatile memory upon the passive optical network (PON) recovering from a network disablement (query 50). However, the YES branch and the NO branch of query 50 in FIG. 4 are inadvertently transposed with one another. The attached sheet includes a new version of FIG. 4 correcting the YES branch and the NO branch of query 50.

Attachment: Replacement Sheet (1)
